# MOXVEDA

## UNLOCK GLOBAL POTENTIAL FOR YOUR BUSINESS

PROCESS 9

DIGITAL LOCALIZATION WITH SEAMLESS PRECISION

MoxVeda stands as a pioneering integrated platform for the localization of digital assets. It presents a unified solution, enabling users to effortlessly translate a diverse array of digital properties, including websites, mobile applications, software applications, and transactional journeys, into a language of their choice, all without the need to tinker with the source code, databases, or content management systems.
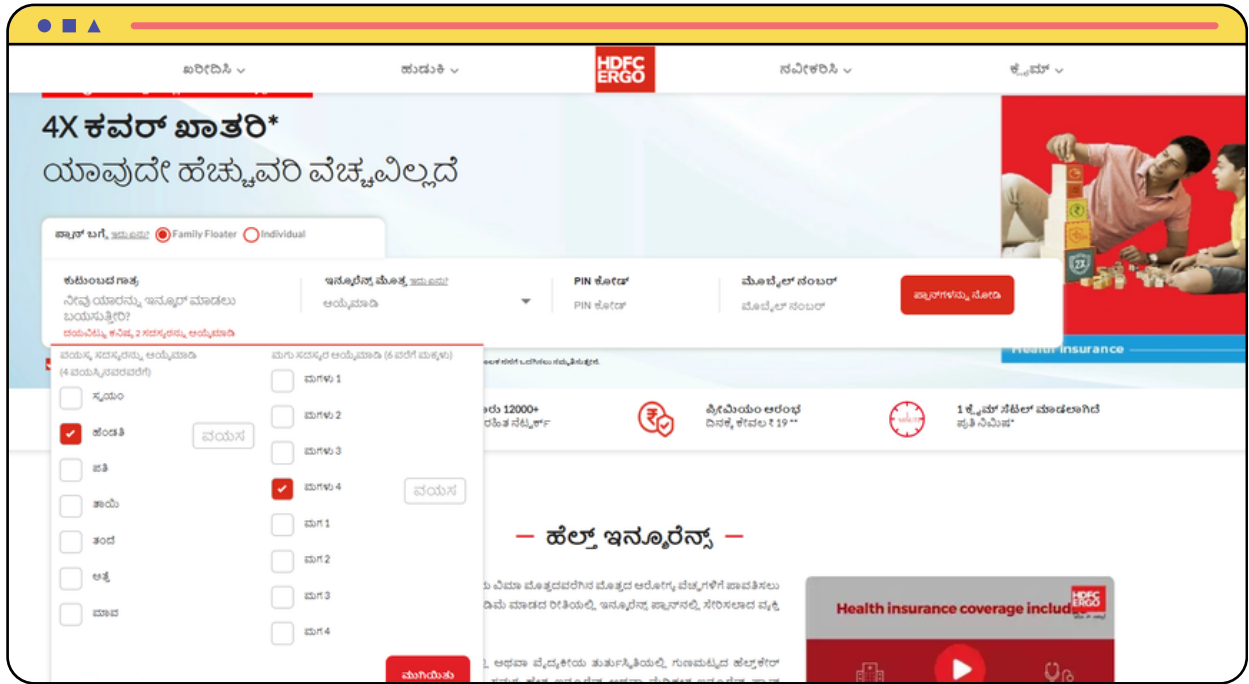

The versatile MoxVeda platform can localize any type of digital property. It supports all popular CMS platforms like Wordpress, Drupal, Joomla, Shopify, Magento & even complex platforms like AEM & LifeRay. It is also compatible with all major tech stacks like HTML, Java, PHP, Linux, DotNet & React. It can be used to localize applications of Android as well as iOS.

Here are some live examples of MoxVeda in action:

Website for MyVestige localized for India, Bangladesh, UAE and Saudi Arabia

HDFC Ergo's Health Insurance Policy Purchase Workflow

- Integrate voice-based search in different languages

- Control which parts to translate & ignore
- Control the source of translation
- Choose from 200+ language options

- Hosting of localized websites included
- Unlimited bandwidth
- Scale-up & down as per needs

SYSTEM ARCHITECTURE

MoxVeda operates as a cloud-based platform, deployable either within Process9's private cloud or in your own cloud infrastructure or physical data center. Setup involves providing information on sections to translate versus those to be excluded, as well as specifying target languages. Once configured, MoxVeda automatically identifies and collects content for translation, utilizing MoxWave, Process9's proprietary cloud-based automated translation system. This system offers advanced features such as spell checks, term-base checks, and manual verification.

Upon receiving translations, MoxVeda recreates the localized web page, serving it to viewers while also storing the translation for future requests. This approach ensures that original and translated pages remain in sync at all times.

In addition to text translation, MoxVeda manages images and design elements, preserving image fidelity while adapting design for a consistent user experience across languages.

PROMINENT ADVANTAGES

All-in-one solution for localizing websites, mobile apps, transaction portals, customer service portals, and various digital properties from a single interface.

Seamlessly integrates with your systems, without making changes to backend databases, CMS, source code, design, or UX. It accommodates dynamic code and UI/UX changes.

Supports major development platforms and coding languages used to create websites and apps, offering flexibility and adaptability.

Users can tailor localization by specifying sections for translation, target languages, term-base, & translations source (machine or human translation).

Every translation conducted through MoxVeda is stored in its intelligent translation memory, minimizing translation costs by 25 – 60%.

Offers rapid scalability at Process9's hosted cloud servers or within your data centers, adapting to your evolving needs.

Consolidates all digital properties under one umbrella and streamlines content, workflows, & costs. It provides a unified view of translation expenses.

Hosted on secure cloud, encrypted with HTTPS protocols, & compliant with VAPT. For added security, host MoxVeda in your personal data center.

Supports over 200 global languages, term-base, spell checks & more. Can integrate with any machine translation engine of your choice.

CLIENT FEEDBACK

"Being a global organization, we understand the importance of being present in multiple languages. With Process9, we found the right balance of tech expertise and language expertise. With our apps, websites and marcom collateral converted to 9 Indian languages through tools offered by Process9 – MoxWave and MoxVeda, we are seeing a steady growth in our app downloads as well as a healthy rise in consumer engagement. The technology is great, with an impressively high degree of accuracy. The entire process from start to go-live was quick and smooth. The architecture passed all our stringent data security checks. Continues to be a delight working with Process9 solutions."

FMC | An Agricultural Sciences Company

"Just having satisfied customers isn't enough anymore. Creating customer delight is. We wanted to reach out to our ever growing partner network in their own language to be able to connect with them at a deeper level. Process9's MoxVeda technology enabled us to achieve that with minimal effort from our team."
